# ZULAFLY

## ZulaFly means Savings.

In a setting where peace and ease-of-mind is hard to come by, ZulaFly allows your patients to have versatile, immediate access to a nurse or other staff at the press of a button. Likewise, staff can easily alert a co-worker when an emergency arises. Is your team spending too much time searching for supplies and critical equipment? Is rental equipment sitting months before being returned? Are assets going missing, with no indication of where they went? If you answered yes to these questions, ZulaFly has a platform tailor-made to save time and money. Additionally, ZulaFly's environmental solutions alert proper sources when temperature changes are detected in rooms, as well as out-of-range readings on fridges and freezers. Real-time reports and custom dashboards create a healthy flow of information, including staff assistance response times, how much time staff is caring for patients, and where patients are spending time throughout the facility. Safety, security, and useful data come together to increase vitality, satisfaction and aide your bottom line.

**That's ZulaFly Savings.**

**Let us be  
your fly on  
the wall.**
