ZULAFLY

ZulaFly means Efficiency.

What if you could keep precise track of each expensive tool or piece of equipment at a vast facility or jobsite? What if you spent more time working and less time searching? The result would be inevitable: Increased staff and customer satisfaction. ZulaFly is here to carry the load with features allowing you to use GPS to track high-dollar equipment like forklifts or trailers in and out of the facility. Our manufacturing solutions don't stop there. With mobile duress, workers can alert personnel if they need assistance at a time where it may be difficult to be seen or heard. Temperature monitoring alerts you when the Mercury in a cooler or storage area has gone too high or low. Real-time reports and custom dashboards help you see everything just the way you want it. Our team is dedicated to giving you a system that creates seamless workflow, removes distraction, and launches your business to new heights.

That's ZulaFly Efficiency.

**Let us be
your fly on
the wall.**
