ZULAFLY

Five Solutions. One System.

ZulaFly aims to provide real-time data, communication and dashboards that prove vital to growth and success. This goal is achieved through five primary solutions, efficiently packaged into one system. Asset Management allows you to tag and track what's most important to you. Temperature Monitoring alerts the appropriate people when cooler or storage area levels are out of range and critical inventory such as food or medication is at risk. With the Staff Safety feature, ZulaFly ensures each of your team members is comfortably focused on the job and distraction is minimized. Mobility, Fleet & Capital Management infuses the power of GPS into your business, providing critical knowledge of where your equipment is and when it's on the move. Additionally, ZulaFly believes in providing a committed team to assist with implementation and support, ensuring each solution is optimized for the specific needs of your organization.

Endless Possibilities... That's ZulaFly.

**Let us be
your fly on
the wall.**
