# ZULAFLY

## ZulaFly means Freedom.

'Senior Living' and 'Freedom' aren't usually parallel terms... until now. Thanks to ZulaFly, your residents have versatile, immediate access to a nurse or other staff at the press of a button. Likewise, your staff members are equipped to easily alert a co-worker when an urgent situation arises. Staff and residents live and operate with fewer distractions, added comfort, and a peace-of-mind knowing assistance is at their fingertips. ZulaFly's solution also alerts proper sources when temperature changes are detected in rooms, as well as out-of-range readings on fridges and freezers. Real-time reports and custom dashboards create a healthy flow of information, including how many assistance requests have been made, how quickly they were responded to, and how much time staff spends caring for residents. Safety, security, and useful information come together to increase satisfaction and aide your bottom line.

**That's ZulaFly Freedom.**

**Let us be  
your fly on  
the wall.**
