

Enterprise Solutions

Hand Hygiene

Prevent infection and save lives with hand hygiene monitoring solutions that work.

ZulaFly offers enterprise hand hygiene monitoring solutions to help prevent infection spread and reduce Healthcare-Associated Infections (HAIs).

IMPACT

- ✔ The use of a sensor-based electronic hand hygiene system more than doubled hand hygiene compliance in an acute care environment.
- ✔ With ZulaFly's real-time dashboard views and configurable reports, compliance can be demonstrated across all areas of the facility.
- ✔ The system also supports customizable room rules and time parameters, allowing for the definition of successful hand hygiene opportunities.
- ✔ Down to the unit level, staff can monitor ongoing compliance, work proactively with their teams to improve practices, and celebrate successes.

Digitalize your Hand Hygiene Compliance Reporting

Reduce risks for HAIs and eliminate time spent on manual data entry and building compliance reports.

- ✔ Meet The Joint Commission requirements by adopting an electronic monitoring system either with or without real-time location systems.
- ✔ Ensure 100% hand hygiene compliance data is collected confidently without bias.
- ✔ Analyze true compliance rates and provide actionable insights into where improvement is needed.

BENEFITS

Real-Time Compliance Tracking

Monitor real-time metrics to identify staff members with compliance opportunities, ensuring that hygiene standards are consistently met.

Customizable Protocols

Implement customized entry and exit rules that align with your facility's specific protocols, allowing for more accurate and relevant monitoring.

Detailed Reporting

Generate reports from the enterprise level down to individual units, providing comprehensive insights into compliance across the organization.

Event Identification

Identify compliance events for multiple staff members in a room, enhancing accuracy in tracking and improving overall hygiene practices.
