

Enterprise Solutions

Senior Living

Provide an improved and safer resident experience with ZulaFly's enterprise location and safety solutions. Elevate your resident and staff experience while ensuring safety.

Optimize Operations Across Multiple Sites

-  **Enterprise View**
See all of your sites key performance and safety data in one dashboard.
-  **Comprehensive Reporting**
Analyze and compare reports for a complete view of operations and response times. Customize dashboard views for real-time insights into staff, equipment, and resident data.

Nursecall Integration

-  **Smart Alerts**
Integrate ZulaFly with your nursecall system to enhance notifications. The solution adds a layer of escalation and visibility for unattended calls, ensuring prompt attention.
-  **Enterprise Reporting**
Analyze response times and volume to identify areas for operational improvements.

Boost Resident Safety and Mobility

-  **Instant Assistance**
Residents can call for help with a simple button press, allowing staff to quickly know their location and provide timely assistance without them needing to find a call box.

Staff Locating and Duress

-  **Immediate Alerts**
Discreetly call for assistance from any location with any communication device through real-time dashboard updates with current staff locations.

DATA DRIVEN INSIGHTS

Real-Time & Historical Reporting

Combine real-time data with historical reports for informed decision-making.

Custom Dashboards

Create personalized dashboards to streamline information flow and improve service levels.

Improve Care Quality

Use data to elevate service levels at your facility.
