Staff Rounding

Keeping-up with staff rounding using manual processes is difficult. ZulaFly's solution automates this process, ensuring effective patient care and efficient staff management.

OVERVIEW

Effective staff rounding enhances patient care by focusing on safety, timeliness, communication, and overall experience. For staff, it offers a chance to observe adherence to safety initiatives and the use of communication tools.

- 7 Automated real-time rounding status of each patient, staff that performed the rounding and time entered for rounding
- 7 Patient information de-identified for privacy
- 7 Real-time location of patient
- 7 Ability to customize dashboard to see multiple sets of information
- 7 Ability to customize rounding timeframe per room

BENEFITS

Tag & Locate

Immediate visibility to your entire fleet of equipment for various workflows.

Recall Assignment

Develop an automated workflow to manage and decommission recalled assets.

Rental Equipment Returned On-Time

Manage and track equipment rentals through a single dashboard view.

Historical Data Feeds Utilization

Data feeds of asset usage to improve allocation and utilization.

Real-Time & Historical PAR Levels

Manage, optimize and automate equipment PAR Levels using location data.

Preventative Management Information

Leverage real-time data to better manage ongoing PMs and workflows.
