

Enterprise Solutions

Staff Safety

Support your team members with an enterprise safety and assistance system. Team members can focus on their work with minimal distractions.

ZulaFly has deployed numerous staff safety solutions in hospitals, senior care facilities and clinics. Healthcare workers face extreme risks. Some notable statistics:

- Workplace violence is 4X more common in healthcare
- Healthcare workers accounted for 73% of all nonfatal workplace injuries
- 1 in 4 nurses experience workplace violence every year

EXPECTED OUTCOMES

- Fully protect your critical and vulnerable staff members
- Increase staff satisfaction and loyalty
- Improve enterprise safety with automated alerting

ZulaFly Client Success: University Medical Center

UMC turned to ZulaFly for a comprehensive, cloud-based visibility solution. The platform connects and displays enterprise locating and panic alerting notifications.

BENEFITS

Discreet Alerts

Staff members can silently alert others in dangerous situations with the press of a button, minimizing disruptions and maintaining a calm environment.

Silent, Location-Based Notifications

In settings like healthcare, where loud alerts can escalate situations, ZulaFly enables quiet, location-based calls for help. This ensures a swift response without drawing unnecessary attention.

Seamless Operations

By enabling real-time location-based notifications and unlimited notification escalations, ZulaFly keeps your staff moving at the pace needed to provide an exceptional patient and resident experience.

Unlimited Integrations

ZulaFly can receive notifications from any hardware manufacturer and centralize all alerts and alarms through enterprise dashboard.
