

Enterprise Solutions

Workflow

Enterprise-class tools and applications needed to master daily operations, ensuring patients and residents receive the highest quality and timely care.

Our solutions replace your manual processes and guesswork with data-driven insights, allowing you to proactively address issues before they escalate.

- Streamline patient check-in and data flow with EMR integration
- Understand patient flow and cycle times

- Alleviate bottlenecks to increase patient satisfaction and revenue
- Numerous Patient Experience and Operational Efficiency Key Performance Indicators

\$20 Million Savings Potential*

Length of stay can be dramatically reduced which can convert to tens of millions of dollars of savings.

*Based on assumption of 425-bed hospital with an average \$4500 margin per admission and dropping the length of stay by one day. KaufmanHall's National Hospital Flash Report, April 2024.

Customized Dashboards

Empower managers, directors, and charge nurses to receive real-time alerts and generate reports that maximize the efficiency of people and assets.

BENEFITS

Monitor Key Metrics

Stay on top of critical indicators like capacity, wait times, bed utilization, and room utilization rates with ZulaFly's real-time data.

Track Patient Journeys

Gain insight into patient cycle time and patient locations during their visit, ensuring smoother transitions and better overall patient experiences.

Identify Bottlenecks

Utilize data to pinpoint inefficiencies and identify bottlenecks in patient care, allowing your team to focus more on direct care and less on resolving issues.

Improve Staff Efficiency

Collect and analyze data on patient/caregiver interactions to understand natural workflows and optimize staff time, increasing both patient and staff satisfaction.
